

8 Steps to Spill Response

Assess the Risk

Ensure everyone is safe.
Assess what has been spilt and any effects to persons or the environment. Raise the alarm.

Environment

Seal off drains and gullies

Stop the spill

If safe to do so, stop the spill at the source

Contain

Contain the spill

Absorb & Clean

Absorb the spill and clean the area.

Disposal

Safely dispose of any used absorbent materials in hazardous waste bags

Report

Report the incident to the relevant people

Re-stock

Replenish any used spill materials to ensure you are protected for future
